

Maximilla Moraa

Maximilla is 15 years of age. She is looking forward to joining secondary school. She is a very bright young lady which is indicated in her report card whereby she is 356/500 marks.

Maximmilla has never seen her dad ever since she was born. She stays with her mum who is the only provider in her life. Her mum works as a cleaner at a local bank. She earns 150 euro which she uses in paying rent, setting food on the table in addition to meeting medical bills.

Her income is insufficient to support Maximilla to high school. She is pledging for any well-wisher to help her with her high school education, so that she can meet her dream of becoming a neurosurgeon.

She enjoys athletics very much.
