

Gilbert Ngala

Gilbert is 16 years of age. He is looking forward to joining a High school in July. He managed to score 386/500 marks in his national exams of primary level.

Family Background

Gilbert is the 3rd born in a family of 5 children. He is a very bright young man who is not sure of his future since his father cannot afford to send him to secondary school. His dad works casually as Manson. His work is not frequently as before due to Covid challenges. He might go for weeks without any call for work.

Gilbert's elder siblings who finished free primary education were not able to join secondary school due to fees challenges. Currently, they are also searching for odd jobs.

All the family members stay in one room house which has electricity but no running water. Gilbert is pleading for any willing donor to support him so that he can meet his dream. His future ambition is to become a car engineer.

He enjoys playing football, while his favorite subjects are mathematics and sciences.
